GitHub: <https://github.com/debidutta123>

Portfolio: <https://debidutta-sahoo.vercel.app>

LinkedIn: <https://www.linkedin.com/in/debidutta1210>

OBJECTIVE

Motivated and technically skilled with a strong foundation in Electrical and Computer Engineering, along with expertise in Python, AI/ML fundamentals, and full-stack web development using Django and React.js. Committed to building intelligent systems, solving real-world problems, and continuously advancing skills in emerging technologies through meaningful projects and collaborative teamwork. <https://github.com/debidutta123>

EDUCATION

B.Tech in Electrical and Computer Engineering, Ajay Binay Institute of Technology, Cuttack, Odisha (2022 – 2026)

12th (Science) with 65% marks, Ravenshaw Higher Secondary School, Cuttack, Odisha (2020 – 2022)

10th with 88% marks, Secondary Board High School, Cuttack, Odisha (2020)

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL

Frontend: HTML, CSS, React.js

Backend: Node.js, Express.js, Django

Database: MongoDB, MySQL

Tools: Git, GitHub, Postman, VS Code, PyCharm, MS Office

Concepts: REST APIs, Authentication, CRUD Operations, API Integration

PROJECTS

ResumeCraft:

- Designed and developed a full-stack AI-powered resume builder application with secure user authentication and resume management features.
- Implemented AI-based resume enhancement and content generation using OpenAI and Gemini APIs to improve resume quality and ATS compatibility.
- Built responsive frontend interfaces using React.js and integrated backend APIs using Node.js, Express.js, and MongoDB.
- Added resume preview and PDF download functionality for better user experience.
- Role: Full-Stack Developer responsible for application development, AI integration, database design, and deployment. [\[Live Preview\]](#)

SEO Rank Monitor:

- Designed and developed a full-stack SEO rank tracking application to monitor keyword rankings and search engine performance across multiple websites.
- Implemented keyword tracking, ranking history, and performance analytics features using React.js, Node.js, Express.js, and MongoDB.
- Built interactive dashboards with data visualization to help users analyze SEO trends and track ranking changes over time.
- Role: Full-stack developer responsible for frontend development, backend APIs, database design, and application deployment. [\[Live Preview\]](#)

Facial Recognition Attendance System:

- Developed a desktop-based attendance management system using facial recognition technology for automated student attendance tracking.
- Implemented face detection and recognition using OpenCV and integrated student registration and authentication modules. Designed GUI interfaces using Tkinter for student management and attendance monitoring.
- Improved attendance accuracy and reduced manual entry process through real-time face recognition.
- Role: Developed complete application logic, GUI design, and face recognition module. [\[GitHub Repo\]](#)

Paylio – Online Money Transfer Web App:

- Built a secure online money transfer web application with user authentication and account management functionalities.
- Implemented CRUD operations, KYC verification features, transaction handling, and balance management modules.
- Developed responsive frontend pages and integrated backend functionalities using Django framework.
- Focused on secure transaction workflows and database management.
- Role: Developed backend logic, authentication system, and database operations. [\[GitHub Repo\]](#)

Customer Shopping Behavior Analysis:

- Developed an end-to-end data analysis project to analyze customer shopping behavior and purchasing patterns.
- Performed data cleaning, preprocessing, exploratory data analysis (EDA), and handled missing values using Python libraries such as Pandas, NumPy.
- Designed interactive dashboards and visualizations in Power BI to identify customer trends, spending habits, and product category insights.
- Integrated PostgreSQL database for data storage, SQL querying, and efficient data management.
- Role: Performed data analysis, data visualization, SQL integration, dashboard creation, and business insight generation. [\[GitHub Repo\]](#)

CERTIFICATIONS

- **The Complete 2024 Web Development Bootcamp** – Udemy
 - Learned full-stack web development including HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, and REST APIs through hands-on projects.
- **100 Days of Code: The Complete Python Pro Bootcamp** – Udemy
 - Gained strong understanding of Python programming, automation, APIs, object-oriented programming, GUI development, and real-world application building.
- **Artificial Intelligence and Machine Learning** – Central Tool Room & Training Centre, Ministry of MSME
 - Learned fundamentals of AI/ML including supervised learning, model training, data preprocessing, and practical implementation of machine learning concepts.
